

Warden Privacy Policy

This is a document detailing the information collected by Warden for its products/services (hereafter “**Services**”) from the users of those services (hereafter “Users”) or Users who may not even be aware of the existence of the Services.

The amount of data collected from each individual Users will vary depending on the purpose that the data is being collected. Data will never be sold or transmitted to any outside party for any purpose, unless it is entirely anonymized metrics or other statistics.

Types of Data Collected

- Blacklist Data
- Usage Data

Blacklist Data

Blacklist Data is collected without prior consent of the individual Users, and is provided by individuals associated with Warden in the form of Contributors, or by Staff of Warden itself. The purpose of this data being collected in general is to facilitate the sole-purpose of the Warden Services in blacklisting Users associated with intellectual property theft and video game cheating specifically of the CitizenFX Platform.

This data may include:

- Discord User ID (hereafter “**UserID**”)
- Discord Account Username and Discriminator (hereafter “**Username**”)
- Discord Profile Picture Link (as provided by Discord API) (hereafter “**PFP**”)
- Discord User Status (hereafter “**Status**”)
- The Guild ID and Name of the specific Guild the Users are in (hereafter “**Guild Information**”)
- The Roles in the specific Guild the User is assigned (hereafter “**Roles**”)
- The Date and Time the Users joined the specific Guild (hereafter “**Join Date**”)

The Status and Join Date is immediately discarded and not retained.

The UserID, Username, and PFP are retained for identification of the specific Users in the future by the Services. This information is not kept up-to-date, and is only further updated upon the Users data being re-collected again from a Guild.

The Guild Information and Roles are retained solely for the purpose of allowing the user to perform an appeal to be removed from the blacklist, in order to provide the user information about the offending Guilds they were added to the blacklist for being associated with.

At any time and for any reason, any individual Users may contact the Staff of Warden or the Services and request that their data be anonymized. Anonymization will remove all identifying information about the user except for the unique UserID that is collected above,

preventing anyone from recognizing the user without directly checking that user against the database.

Anonymization requests can be delivered via Email, Direct Message on Discord, or via means of the Discord Guild for Warden.

This data is encrypted at rest by Warden, and is not sold, shared, or otherwise provided to any third parties or anyone outside of Staff of Warden or the Services.

Usage Data

Warden may collect data related to how the Services are being used in order to prevent abuse of the Services, log errors in the Services, confirm proper functionality, further develop the Services, or provide anonymized metrics about the usage of the services.

This may include identifying information about the Guilds using the services, information about the individual Users who are directly interacting with the Services, or anonymized metrics of both. Data that is not anonymized is not shared outside of the Staff of Warden or the Services.

This document was last updated 9/15/21 and is version 1.
